Courses in Scientific Integrative Medicine & Rehabilitation

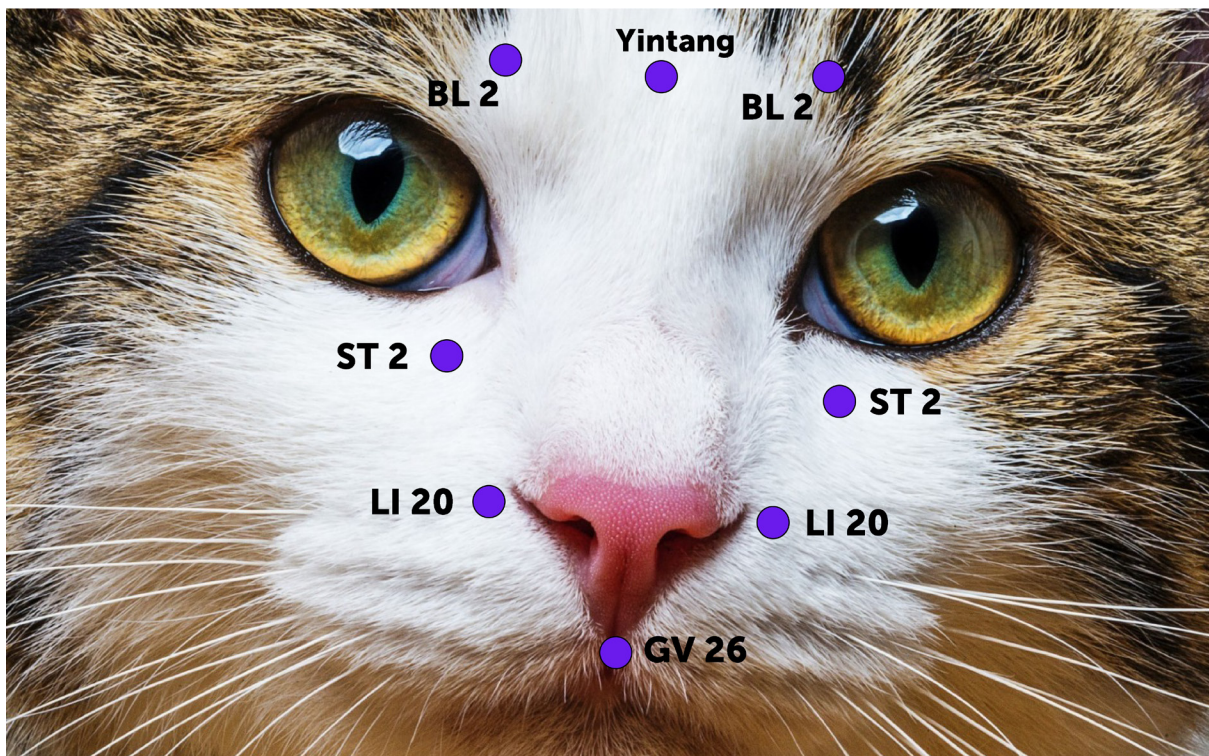

Online & In-Person Learning

CuraCore® VET Programs

Acupuncture

- **Medical Acupuncture for Veterinarians Certification Course (MAV) (130 Hrs. Online/In-person)** In 1998, Dr. Narda Robinson developed the first university-based program in veterinary medical acupuncture. Since then, MAV has remained the leader in innovation and faculty expertise. Choose your primary track in small or large animals. Then, add certification in the second track (small or large animal), or advanced certification in exotic or feline acupuncture. (Veterinarians/Veterinary Students - <https://curacore.org/vet/courses/acupuncture/>)
- **eMAV™ Medical Acupuncture for Veterinarians Certification Course (MAV) (130 Hrs. Online)** Similar curriculum to MAV, eMAV gives you the unique opportunity to earn your medical acupuncture certification 100% online. (Veterinarians/Veterinary Students - <https://curacore.org/vet/courses/acupuncture/>)
- **Advanced Medical Acupuncture (85 Hrs. Online)** AMA refreshes participants on central, peripheral, and autonomic nervous system anatomy, acupuncture physiology, design of neuromodulation protocols, and the latest advancements in the field. (Veterinarians/Veterinary Students - <https://curacore.org/vet/courses/acupuncture/>)
- **MAV Master Classes (1.5 Hrs. Each Online)** MAV Master Classes target one hot topic each month. Open to graduates of science-based acupuncture programs. (Veterinarians/Veterinary Students - <https://curacore.org/vet/courses/acupuncture/>)
- **Medical Acupuncture for Veterinary Technicians (7.5 Hrs. Online)** MAV-T teaches veterinary technicians about the mechanisms of action, indications, technical aspects, and evidential support of medical acupuncture. It prepares technicians to effectively assist veterinary acupuncturists and inform clients about its many benefits. (Veterinary Technicians - <https://curacore.org/vet/vet-techs/>)

Photomedicine

- **Photomedicine for Veterinary Professionals (50 Hrs. Online)** Topics include tissue repair, analgesia, circulatory restoration, neuroprotection and neural regeneration, reduction of inflammation, and immune modulation. Clinical applications include neurologic disease, musculoskeletal injury, pain, and internal medicine disorders. (Veterinarians/Veterinary Students/Veterinary Technicians - <https://curacore.org/vet/courses/photomedicine/>)

Botanical Medicine

- **Botanical Medicine for Veterinarians Certification Course (110 Hrs. Online)** Herbs cannot replace the drugs in your pharmacy because too little research exists. However, this course will give you confidence to inform clients about the pros and cons and best ways forward as a Certified Veterinary Botanical Medicine Consultant. (Veterinarians/Veterinary Students/Veterinary Technicians - <https://curacore.org/vet/courses/botanical-medicine/>)
- **Cannabis for Veterinary Professionals (20 Hrs. Online)** Study phytocannabinoid chemistry and pharmacology, the endocannabinoid system, cannabis products and testing, environmental impact of growing cannabis, and more. (Veterinarians/Veterinary Students/Veterinary Technicians - <https://curacore.org/vet/courses/botanical-medicine/>)

Massage

- **Medical Massage for Small Animals Certification Course (13.5 Hrs Online; 28 Hrs Onsite)** Learn myofascial palpation, muscular anatomy, structure-function relationships, Swedish massage, and osteopathic myofascial release. (Veterinarians/Veterinary Students/Veterinary Technicians - <https://curacore.org/vet/courses/massage/>)

Integrative Rehabilitation

- **MOVE: Integrative Rehabilitation and Physical Medicine Certification Course (137 Hrs. Online; 40 Hrs. Onsite)** Enjoy the actively engaging CuraCore curriculum, cohesive and fully-contained coursework, multidisciplinary instruction, and abundant hands-on practice. Uniquely suited for healthcare professionals who seek to focus more on individual, patient-centered, non-surgical restoration than high-volume protocol-driven settings for post-op recovery. (Veterinarians/Veterinary Students/Veterinary Technicians - <https://curacore.org/vet/courses/integrative-rehabilitation/>)
- **MOVE Master Classes (1.5 Hrs. Each Online)** Just like our MAV Master Classes, MOVE Master Classes focus on a single topic and cover it in-depth. (Veterinarians/Veterinary Students/ - <https://curacore.org/vet/courses/botanical-medicine/>)

CuraCore® VET Founder and CEO

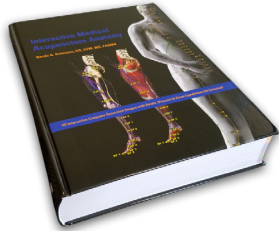

With over two decades of experience teaching, practicing, and researching integrative medical approaches in both veterinary and human osteopathic medicine, Dr. Robinson has taught thousands of healthcare professionals the sound, scientific approach to medical acupuncture, soft tissue manual therapy, photomedicine, and herbs.

In 1998, Dr. Robinson launched Colorado State University's first integrative medicine service and for eight years directed CSU's Center for Comparative and Integrative Pain Medicine. She now heads CuraCore® VET and CuraCore® MED, as President and CEO, teaching scientific integrative medicine in the US, Canada, and abroad.

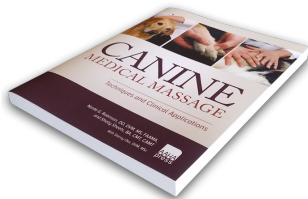

Dr. Robinson holds a Bachelor of Arts (AB) degree from Harvard/Radcliffe, a doctorate in osteopathic medicine (DO) from the Texas College of Osteopathic Medicine, as well as a doctorate in veterinary medicine (DVM) and master's degree in biomedical sciences (MS) from the Colorado State University College of Veterinary Medicine and Biomedical Sciences. She is a fellow within the American Academy of Medical Acupuncture (AAMA) and has served on the American Board of Medical Acupuncture and the AAMA Board of Directors.

Interactive Medical Acupuncture Anatomy, Dr. Robinson's landmark neuroanatomic atlas, represents the culmination of fifteen years of study into the structure-function relationships of acupuncture points and their supporting evidence.

Canine Medical Massage, which Dr. Robinson co-authored with massage therapist Shelley Sheets, combines osteopathic medical principles with Swedish massage techniques to produce the first canine medical massage book, also the companion text for our veterinary medical massage and myofascial palpation course.
